What is a Wellbeing Economy?

A 'Wellbeing Economy' is an economy that delivers **social justice on a healthy planet**.

At its core, a Wellbeing Economy is designed with a different purpose: it starts with the idea that the economy should serve people and communities, first and foremost.

A Wellbeing Economy satisfies five universal human needs for a good life. **We call these the '5 WEAll Needs'**

These are the factors a Wellbeing Economy would nurture, to be 'successful'.

What is a Wellbeing Economy?

WEAll's [Old Way to the New Way page](#) outlines how a Wellbeing Economy will address issues differently – ranging from work culture to the food system to the justice system.

There is not one blueprint for a Wellbeing Economy; the shape, institutions, and activities that get us there will look different, both across countries and between different communities within countries. However, the high-level goals for a Wellbeing Economy are the same everywhere: **wellbeing for all, on a flourishing planet.**

Overlaid on this background are three horizontal orange rectangular boxes that serve as a backdrop for the text.
